EDUCATION

Python Programming
Bachelor of Science IT
Maseno University
2021 - 2025

High School Studies
Litein High School
2017 - 2021

EXPERTISE

Software Development
Artificial intelligence
Python Programming
Microsft Dynamics
Web design

LANGUAGE

English
Swahili

Experience

May 2024- Sept 2024

Millenium Solutions E.A Limited

Software Developer

I developed and optimized ERP systems to streamline business processes such as inventory management, finance, HR, and procurement. My role involved designing user-friendly modules, integrating third-party services, and ensuring seamless system performance through testing and debugging. I also provided technical support and training to users, helping them maximize the system's efficiency while adhering to data security and industry standards.

2020 - 2021

STEM Impact Centre

Project Intern

As a project intern, I contributed to the development of Compost IT, a project focused on waste recycling and composting. My responsibilities included designing and implementing key features for tracking waste collection, composting processes, and output management. I collaborated with a team to ensure the system's scalability and efficiency, enhancing its impact on promoting sustainable waste management practices. This experience helped me gain hands-on knowledge in project development and environmental sustainability solutions.
